

Business Enablement

ADVASO

Business Enablement Services

With a combination of in-depth expertise and a focus on business processes, ADVASO is committed to supporting and accompanying companies in their digital growth and success.

The business objective is always at the center of our activities and forms the basis of our work.

We have translated our experience and success formulas into methods and blueprints to create sustainable value for our customers more easily and quickly.

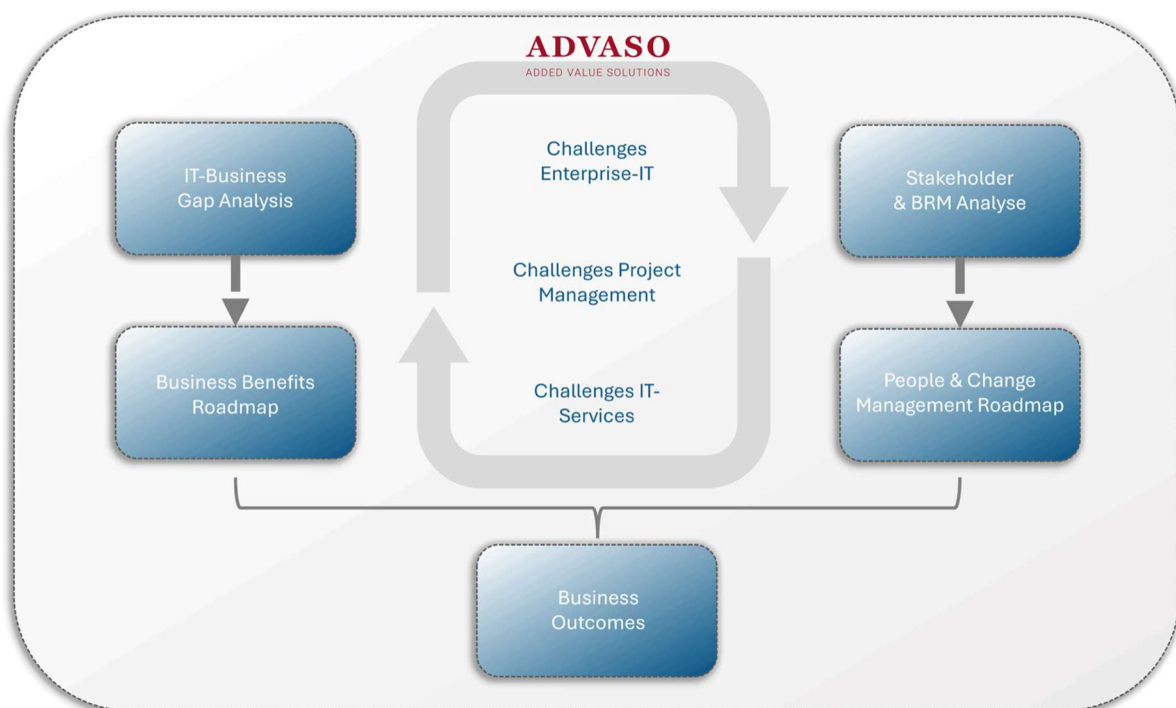

Our direct and indirect customers include national and international companies and corporations with a focus on the telco, finance, logistics, and industrial sectors.

Business-IT Enablement Services

In a world where digitalization is advancing relentlessly, a company's ability to optimize its business processes through innovative IT solutions is crucial for long-term success.

ADVASO defines Business IT Enablement as creating a successful IT platform aligned with business objectives, enabling companies to act agilely, efficiently, and competitively.

Our approach focuses on designing IT in a way that optimally supports business processes while leaving room for innovation. We work closely with our clients to develop a deep understanding of their individual needs and challenges. Based on this, we design tailored IT solutions that are not only aligned with current requirements but are also flexible enough to adapt to future developments.

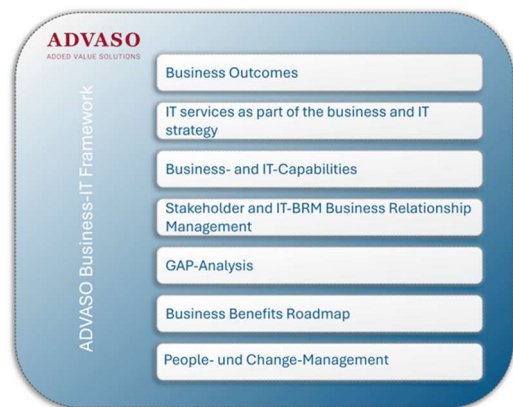

The services are based on the proven ADVASO approach, the Business IT Framework, and the implementation tool Business Enablement Studio.

ADVASO Business Enablement Studio

The ADVASO Business-IT Framework provides the proven methodology behind the Business Enablement Studio.

It reflects the following aspects of an effective IT services organization in interaction with the business:

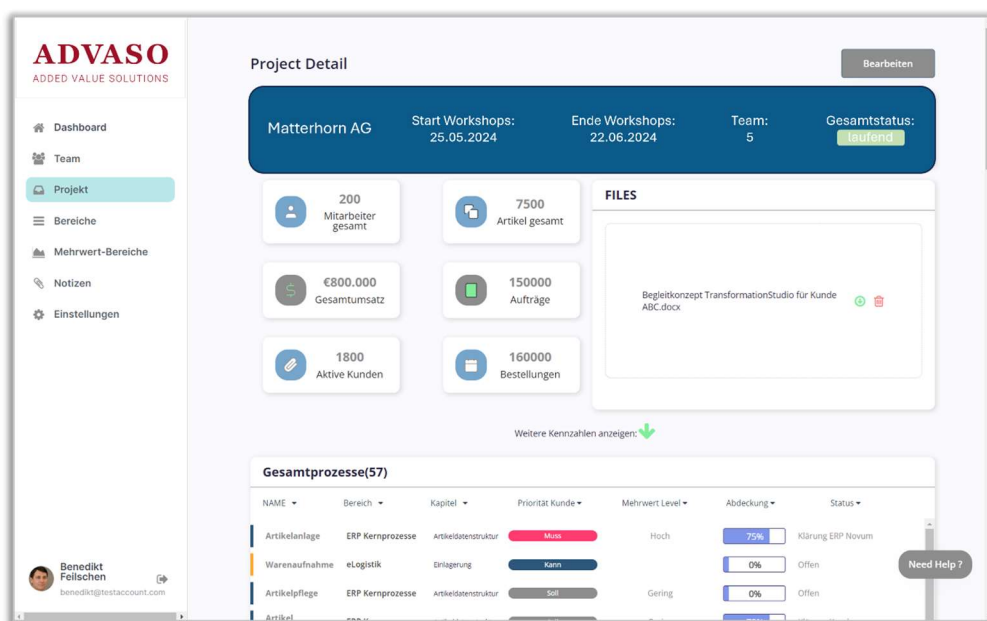

The "Business Enablement Studio" by ADVASO is a specially developed software designed to facilitate the (further) development of IT services, business services, operations, as well as people and change management.

By using this innovative platform, companies can streamline and adapt their internal processes and services—ranging from the implementation of new technologies to the optimization of existing workflows.

The Business Enablement Studio serves as a central interface that enables leaders and teams to proactively manage changes by providing a clear overview of all ongoing and planned projects. By integrating people and change management tools, the Studio supports companies in preparing their employees for

changes and actively involving them in the process, ensuring a seamless and effective implementation. With this approach, ADVASO offers a comprehensive solution that not only fosters development but also ensures the successful implementation of IT and business services.

From the introduction of new technologies and the optimization of existing systems to the digitalization of business processes—our comprehensive range of services in the area of Business IT Enablement ensures that our clients can fully leverage the benefits of digitalization. By employing state-of-the-art technologies and methods, we enable not only increased efficiency and cost reductions but also the creation of new business models and the exploration of new markets.

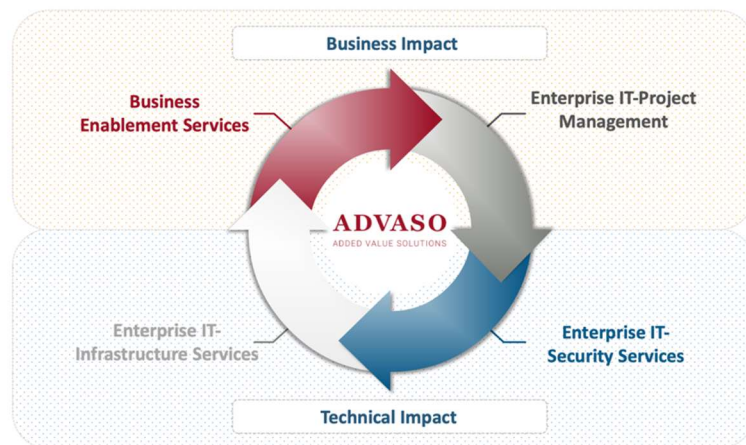

We accompany you every step of the way, ensuring that your IT strategy is perfectly aligned with your business goals, thereby achieving a sustainable competitive advantage.

Why ADVASO Business-IT Enablement Services
